

# Clinical Cardiovascular Assessment

## Patient Clinical Profile

| Clinical Attribute | Value                                                 | Notes            |
|--------------------|-------------------------------------------------------|------------------|
| Patient Age        | 65                                                    | Years            |
| Biological Sex     | Male                                                  | Gender           |
| Probability Score  | 85%                                                   | Model Prediction |
| Clinical Diagnosis | High Risk - Potential Irreversible Condition (Urgent) | AI Analysis      |

## Vegan Dietary Prescription

| FOODS TO PRIORITIZE             | FOODS TO AVOID           |
|---------------------------------|--------------------------|
| • Beets/Pomegranates (Nitrates) | • Added Salts/Sodium     |
| • Walnuts (Vascular health)     | • All Saturated Fats     |
| • Steamed Greens (Low-fat)      | • Canned/Processed foods |
| • Hibiscus Tea (BP Support)     | • Refined Flour          |
| • Low-Glycemic Fruits           | • Coconut Milk/Oil       |

## Clinical Recovery & Exercise Plan

**Primary Clinical Action:** Urgent: Immediate consultation with a Cardiologist recommended.

**Cardiac Protocol:** Supervised cardiac rehab only, Stop if dizziness occurs

**Supplements:** Vitamin B12 (Essential for vegan diets), Algae-based Omega-3 (DHA/EPA equivalent), Vitamin D3 (Vegan-sourced)
